Summary

Junior backend developer with a Biology degree and a few months of experience. Strong analytical skills and a passion for developing efficient applications. Proficient in javascript/express, eager to contribute to innovative projects in a collaborative environment.

Skills

Languages: HTML, CSS , JavaScript

Databases: MongoDB

Version Control: Git, Github

Communication: Ability to convey complex technical concepts clearly.

Team Collaboration: Experience working in team settings.

Research Skills: Ability to conduct thorough research and data gathering.

Experience

(National Service) CSIR Water Research Institute

November 2023 - October 2024

- Engaged in field trips to harvest seaweeds, which improved my ability to adapt to new environments.
- Engaged in preparation of reports after water analysis, which enhanced my report writing skills.
- Participated in research seminars on how to conduct scientific research.

Solidage Africa Foundation, Health screening (volunteer work)

October 2022

- Convinced 30 individuals to partake in health screening activities, which added onto my communication skills.
- Educating 30 individuals on the importance of health screening, I was able to impact their health by educating these individuals.
- Checked the malaria status of 30 participants, through this I learnt to be meticulous in all every step I take.
